Thank you for your interest in *NEW ENERGY: A fresh look at how the Midwest is creating a green energy economy.*

We look forward to sharing this program with many audiences to raise awareness about the ways in which the Midwest and communities across the nation can participate in clean energy development. Please complete and detach this order form and return it with payment to Windustry for your DVD copy of *NEW ENERGY*.

A little background

Windustry partnered with Twin Cities Public Television and Erika Johnson to tell the story of how wind, biofuels, and other renewable energy technologies are contributing to the region's energy security, economic sustainability, and integrity of our natural resources.

Over an 8-month period in 2006, we conducted interviews and filmed locations across the region where energy efficiency and renewable energy are reducing pollution and contributing to local communities.

There's more...

(Un)fortunately, there are so many great energy-related developments taking place that we could not fit it all into one 30-minute program. If you or your organization is interested in using some of the b-roll footage that did not make it into this DVD, please contact Windustry for costs and additional information.
